

Solution Profile

FreeWave's Streaming Video Solution is our new turnkey wireless streaming video system that eliminates on-site theft, productivity loss, and visibility issues and improves personal and public safety.

Get streaming video up to 10 miles, even under the most demanding connectivity challenges.

FreeWave's Streaming Video Solution provides scalable video points on a solar-friendly and ready system to monitor isolated locations in real-time, such as parking lots, RV and outdoor storage, and construction sites.

With FreeWave Streaming Video, you have support from FreeWave Fusion Bridge to ensure seamless wifi-connectivity for your outdoor-rated cameras.

Save Money And Increase Productivity

- Eliminate the additional costs of hiring and training security personnel.
- Monitor multiple cameras and sites from your smartphone or PC.
- Avoid recurring monthly costs.

Eliminate Stress and Protect Your Assets

- FreeWave Streaming Video supports multiple cameras and sites, allowing you to monitor your assets no matter where you are and no matter your connectivity issues.
- Prevent on-site theft while providing on-site personal and public safety.

Save Time

- Easy to install, set up, and use without additional services or training.
- We include the hardware, connectivity, and applications you need to get started immediately.
