

ZumLink™

900 Series Serial Radio Module

Embeddable Industrial-Grade Radio Module

FreeWave's ZumLink™ 900 Series is made for secure collection, transport, and control of data in rugged industrial environments, providing a long-range, low-power solution for remote wireless communications.

Infuse your next product with the industrial-grade reliability inherent in FreeWave's ZumLink serial radio module. The ZumLink Z9-C and Z9-T are ideal for embedded systems that demand the highest standard in quality and performance, particularly in noise congested environments. They provide a Cost, Size, Weight, and Power (CSWaP) advantage with their small, lightweight form factor, industry-leading low power consumption, and low-cost integration.

These user-configurable radio modules operate in the unlicensed 900 MHz spectrum and support multiple high-speed RF link rates up to 4 Mbps.

Note: The ZumLink 900 Series serial radio module shares the same 14-pin interface found on FreeWave's MM2 OEM board-level radios to ease migration (although it is not a drop-in replacement).
