## Wired IO Series

I/O Expansion

The Wired IO Series offers a reliable, safe and easy way to meet the growing measurement and control demands of your automation system.

This I/O expansion module builds on existing communications systems and controller infrastructure to extend the useful life of your automation system. The expansion modules snap easily onto a radio base to provide 188 I/O points over a single wireless link. The Serial Base features a wired serial interface to provide up to 192 I/O points to an existing PLC, RTU or other device with serial communications. Certified for C1D2.

All radios are designed, manufactured, and tested in Boulder, CO.

## **Key Features**

**Modular:** Supports up to 15 expansion modules to a serial base or radio base

Flexible: Supports radio base for wireless I/O or serial base

**Low Latency:** Access times as fast as 11 milliseconds to all available expansion modules

**Powerful:** Universal channels configurable as digital input, digital output, analog input, analog output or sensor power

**Reliable:** Fail-safe settings are user-configurable for DO and AO channels

**Easy Sensor Selection:** Support for 4 to 20 mA, 1 to 5 V and 0 to 10 V transducers with loop power

**High Accuracy:** Maximum reading error of 0.10% of Al channels across entire operating temperature

Low Power Consumption: Ideal for solar, battery, and DC applications

Industrial Grade: Operating temperature from -40°C to +75°C
